ALPay™

Labor & Equipment Costing

ALPay is a comprehensive time keeping application for field personnel and equipment. The system is completely configurable to adapt to any company's cost and account structures. It is fully integrated with Computer Ease®, Computer Guidance®, Geac®, JD Edwards® and Timberline® accounting software products offering a seamless two-way integration of data from the field to the home office. Our XML and data linking capabilities allow ALPay to integrate to any accounting software. This business application is tailored to ease the burden and reduce the costs of tracking and costing labor at all levels of an organization.

ALPay utilizes Microsoft® Windows, Palm Computing® and Windows Mobile® operating systems. Find out more at:
