Going Wireless

ALPay™ Production Module

Information at Your Finger Tips

- Production Notes is a component of ALPay that maintains the cost and account structure within an organization. The application wirelessly provides Total-To-Date Units & Hours, Estimated Total Units & Hours, and Percentage Complete to remote personnel. Additionally, the application allows entry of actual quantities and hours as well as percentage complete for multiple production note types and items. This module is perfect for organizations looking to obtain additional information about the job site.
